Cutting edge animation and gameplay creation is available in FIFA Premier League, giving players the ability to make context-specific football moves. These new animation capabilities enable players to throw the ball against the wall or into the back of the net in order to create goals as they see fit. For the first time in any FIFA title, intuitive football controls change depending on the time of day, weather conditions, and more. Players can now control the entire game with a single button. A quick pinch of the thumb on the left analog stick controls the camera, while a quick flick drags the player to a new location. Players can now throw their opponents with the press of a button, and deliver headers in the blink of an eye. With dynamic crowd support, players can rally their fans in glory with great moments, then give them a well-earned pat on the back as a result of a “Man of the Match” performance. FIFA 22 also introduces a new “player of the month” system that identifies the most promising young talent. FIFA 20 introduced an immersive, cinematic presentation featuring live-action sequences, live crowds, cinematic camera angles, and more. With FIFA 22, the game introduces The Journey which seamlessly connects gameplay and story. The Journey introduces a new, high-fidelity football environment featuring fields with real-time weather effects, dynamic lighting changes, and live crowds. Player, manager, and club celebrities make appearances throughout the game. As players progress through the matches, they will unlock personal and club teams, as well as day and night modes. The Journey ends with a cinematic ending sequence. What you can expect to play in FIFA 22: A new, more advanced, physics-based game engine. Players can throw the ball to unleash a fierce overhead kick or make an acrobatic, diving header. Realistic player likenesses. Players now have unique physiques for each position, allowing them to make every touch as authentic and lifelike as possible. FIFA Ultimate Team. Players can draft new players or premium characters from a variety of leagues and kits. They can also earn FUT packs that contain players and Gold kits that make new players more valuable. New game engine delivers a high-end, physics-based game engine. Players can now perform acrobatic moves, unleash overhead kicks and headers, and even throw the ball at the back
